ADVISORS**

AI-POWERED IT SYSTEMS & OPERATIONS

Reliable Systems.
Scalable Operations.

608 State Street South
Kirkland, WA 98033
(425) 284-3315

In modern organizations, growing infrastructure complexity often turns IT operations reactive rather than strategic. Hitech Advisors helps leaders modernize IT systems and integrate AI-driven automation to manage enterprise-scale infrastructure without slowing innovation. We build the resilient, scalable architectures required for the next wave of digital transformation.

THE REALITY

In complex IT environments, technology is rarely the problem. Operational maturity is.

Infrastructure outpaces operations. Monitoring generates noise. Automation initiatives stall. Legacy systems limit AI.

The challenge is not capability — it is a structured, operational strategy.

THE HITECH APPROACH

Hitech Advisors partners with IT leaders to translate strategy into resilient infrastructure. Through strategic advisory, embedded expertise, and system modernization, we clear bottlenecks, scale architectures, and integrate automation for peak efficiency.

Not staffing. Not reactive.
Real modernization, architected for reliability.

Where Operational Maturity Meets Business Growth

Our Three Execution Pillars

Modern Infrastructure Foundations

We build secure, cloud-ready architectures designed to scale.

Intelligent IT Operations

We deploy AI-driven automation to turn reactive support into proactive operations.

Integrated Systems Evolution

We align your systems, data, and processes to evolve alongside your business.

Technical Depth & Specialty Capabilities

IT Service Management (ITSM) | Infrastructure & Cloud Strategy | DevOps & CI/CD automation | AIOps & Predictive Monitoring | Data Governance & Security | Platform Selection & Vendor Management | System Optimization

Proven Results

- **5,000+** users successfully migrated to a standalone sovereign system with zero downtime.
- Optimized IT spend and boosted asset utilization **30%+** via real-time tracking.
- **25%+** boost in end-user satisfaction scores, driven by a more responsive MDM experience.

Architected for Resilience & Scale

Strategy

Build

Scale

Optimize

Platform Selection & Vendor Management

Leverage AI insights for data-backed platform and vendor evaluations.

DevOps & Continuous Delivery

Automate deployments with intelligent monitoring for speed and reliability.

Infrastructure & Cloud Strategy

Design AI-enhanced cloud systems optimizing cost, performance, and scale.

Data Governance & Security

Detect anomalies, secure data, and maintain compliance using AI.

System Optimization

Streamline operations and reduce downtime with machine learning.

Designed for Decision-Makers Who Value:

- Higher Operational Stability
- Faster Deploy Cycles
- Lower Sustaining Costs
- Cleaner Tech Stack Governance
- Scalable Cloud Infrastructure
- Proactive Risk Mitigation

We don't experiment with AI — we operationalize it for impact.

The Hitech Difference

We don't just keep the lights on; we modernize your IT to drive measurable business outcomes. The Hitech Advantage lies in our ability to seamlessly integrate AI-powered monitoring and automation for reliable, resilient IT. We combine deep enterprise and technical expertise to deliver faster delivery through streamlined DevOps, smarter infrastructure decisions backed by real data, and security that is embedded across every system and process from day one.
